

*City of St. Ann, Missouri*  
**SEWER LATERAL REPAIR PROGRAM COVER SHEET**

The City of St. Ann participates in the Sanitary Sewer Lateral Repair Program. Residential structures of six (6) or fewer units, including single-family detached homes, are assessed annual fee to their property taxes to fund the repair program. Should you experience problems with your sewer lateral, please follow the below steps and check list to ensure an expedient repair.

**Process**

If you are experiencing problems with your sewer lateral follow the below steps.

1. Call a plumber and have the sewer lateral cabled to clear any blockages or root infiltration. This may solve the problem. In areas with mature trees, such as St. Ann, roots are often the cause of sewer backups. If the problem persists, continue below.
2. Submit a completed Sewer Lateral Repair Program Application Packet to the City of St. Ann. Include the following:
  - Completed Application
  - Invoice of sewer lateral cabling, completed within the last 30 days
  - Proof of paid property tax
  - \$300.00 application fee
3. The City will schedule to have the sewer lateral camera inspected to investigate and determine the exact defect. The City will review the findings of the camera inspection and confirm the defect.
4. The City will schedule to have the sewer lateral defect corrected. The correction work is inspected by the City. The City pays the contractor for the work associated with the repair. A one (1) year warranty is provided for all sewer lateral repairs. Should you have additional problems related to the sewer lateral within one (1) year of the repair, contact the City immediately.
